PROFESSIONAL SUMMARY

Computer Information Systems graduate from The Hashemite University and ASP.NET Full-Stack Developer with remote internship experience at max-level-ksa in AI-assisted web development and publishing a live website. Skilled in C#, ASP.NET Core Web API, Angular, JavaScript, HTML, CSS, Bootstrap, SQL Server, Entity Framework Core, LINQ, Git, and GitHub. Familiar with RESTful API development, database-driven applications, authentication concepts, and frontend-backend integration. Seeking an opportunity to contribute to production-oriented web applications and continue developing strong software engineering practices.

TECHNICAL SKILLS

Programming Languages: C#, JavaScript, HTML5, CSS3
Frontend: Angular, Bootstrap, responsive web interfaces, component-based development
Backend: ASP.NET Core Web API, RESTful APIs, CRUD operations
Database and ORM: SQL Server, Entity Framework Core, LINQ
Security: Authentication and JWT concepts
Tools and Practices: Git, GitHub, debugging, API integration, Agile application development
Development Approach: AI-assisted development / vibe coding workflows

PROFESSIONAL EXPERIENCE

Web Development Intern at **max-level-ksa** *(Remote)* | Jul 2026 – Sep 2026

- Used AI-assisted development workflows, commonly referred to as vibe coding, to support website development and implementation tasks.
- Contributed to the development and launch of a live website for ARP Peptide: https://www.arppeptide.com/
- Worked on translating website requirements and design ideas into a publicly accessible web experience.
- Practiced reviewing, adjusting, and validating AI-generated development output as part of the implementation process.
- Gained practical exposure to delivering a website from development through publication.

PROJECTS

ARP Peptide — Live Website | Published Website

- Contributed to the development and publication of a live research-peptide website.
- Website: https://www.arppeptide.com/
- Demonstrated practical experience moving from implementation work to a publicly accessible website.

Fluffy Pet — E-Commerce Web Application | Academic Project

- Worked on an e-commerce web application concept using C#, ASP.NET, Angular, Bootstrap, and database-related functionality.
- Practiced customer registration, cart management, API integration, and frontend-backend communication.
- Applied full-stack development concepts in a team-based academic project.

EDUCATION

The Hashemite University — Computer Information Systems | 2023–2026
Mutah University — Computer Information Systems | 2022–2023

CERTIFICATION

Full-Stack Web Development — ASP.NET and Angular | Consultation and Training Center, Princess Sumaya University for Technology (PSUT)

LANGUAGES

Arabic: Native | English: Intermediate
